

Your Investments...

They represent years (if not decades) of hard work on your part - making tough decisions, saving for your future rather than spending for the moment.

You certainly don't want to throw it all away or lose it.

Life is Full of Risks

It doesn't matter where you are or what you are doing, life is full of risk.

*If you have to be exposed to risk anyway ...
... wouldn't you rather BE PAID to take that risk?*

The Investment Roller Coaster

Investing is DEFINED by risk. Investing is "putting capital (wealth) at risk expecting to see some kind of positive return." (Websters)

No risk ... no return.

Investment markets are a roller coaster and your investment dollars (that you worked so hard to build up over the years) must go on this roller coaster ride with all it's ups and downs.

But what if you could be PAID to ride the roller coaster?

Get Paid to be an Smart Investor

Using a globally balanced "Smart Investor" asset allocation takes many of the rough parts out of that investment roller coaster, making the ride smoother. We can't get rid of all the risk - that would not be "investing," but our strategy takes that Smart Investor approach one step further and actually *Pays You* to ride the roller coaster.

Case Study - Had you invested \$100,000 in this method back in January of 2008, you would have \$116,626 today - a gain of \$16,626. That's \$38,150 better than the person who bought the market in January 2008 and held on to today.

Disclaimer - Past returns are no indication of future performance. This is not a strategy you should try on your own. There are risks and trading costs associated with options - even simple and non-leveraged strategies such as this. Always work with a fiduciary professional.
